

Task 1

Group Task

Group Presentation Making Task

Now that you are in groups, your first task is designed so that you work together and get to know the other members of your group. For this task your group has to create a short presentation of 1 minute's duration with accompanying audio using Powerpoint.

The subject for your presentation can be your favourite band or performer, film or animation, video game, TV show, film or animation character, comic character or any other subject that you want to choose.

Working together as a group discuss possible subjects and agree on your final choice of subject for the presentation. Now set about your task and collaborate with your group members to get some still images or video clips of your subject for inclusion in your presentation. You also have to work together and gather audio clips to accompany the images or video clips.

As a group you have to decide which images, video and audio clips to select and include in your presentation and the order of inclusion. You may also decide to add transitions to the presentation and, if you have time, titles or credits to enhance its appearance.

The object of this task is to get your group to work together as a cohesive unit and make decisions and compromises so that you produce a final product that you have all contributed to and are satisfied with.

When you have finished your presentation you will have to show your final product to the other groups.

This task does not form part of your report assessment.
