

Task 4

Group Task

Work on your Presentation & Practice

Following on from last week's task 3, group members should have completed their individual contributions to the coursework presentation and your task for week 4 is, as a group, to work towards finalising your presentation in preparation for a practice run as a group.

It is strongly advised that you practice delivering your individual part of the presentation and also practice the whole presentation as a group. Timing is important and the group presentation should be 4 minutes in length (no longer). Markers are strict and will stop you if you exceed 4 minutes.

By the end of this lab session you should have finalised your presentation and be working towards organising a group practice run.

The Presentations take place in week 5 and a schedule will be uploaded to Moodle detailing the venue for the presentations and times.
