

Working in Groups

Analyse the coursework task

- The date for delivering the presentation was 21st October.
- The work was allocated but also mixed in with the members.
- Dorota was in charge of the drawing and storyboard; Yu-Ching and Declan was in charge of the idea and research; Ryan was in charge of the audio but we did everything together and each added their own ideas to the presentation.

Plan the work

The presentation had 3 parts to it –

- We introduced the item that we were going to talk about and the associations that would normally come with it.
- The storyboard and how we could develop it further.
- The appeals that came with the item.

Technical Roles

- Dorota – Drawing and animation
- Yu-Ching – Planning and coming up with ideas
- Declan – Planning and research
- Ryan – Audio

Individual & Group Deadlines

- We met up every Monday to go over our presentation.
- The deadline to complete the presentation was 14th of October so there was enough time to refine. We practiced the presentation on for a few days after the 14th so everyone knew when to come in and there would be on time issues – couldn't practice for technical issues but made the files as easily accessible as possible.
