

jQuery Mobile

For a more comprehensive coverage visit :

<https://www.w3schools.com/Jquery/default.asp>

The lectures on jQuery in this module are based on these tutorials on w3schools.

jQuery Mobile app-structure

- jQuery Mobile (jQM) is built on top of jQuery
 - Same basis – selectors for DOM items, but adds CSS for styling (also animations/page transitions)
- Much of JQM works automatically
 - Include the libraries (style-sheets *and* Javascript) and a page will automatically style to suit a mobile device.
 - Uses standard tags (e.g. , etc.) and get styles well suited to a mobile device
- JQM's CSS support includes some very neat tricks
 - A standard HTML page gets re-styled on the fly to appear as a web-app on the device – functions replace existing content with specific styling

```
<!DOCTYPE html>

<html>
  <head> <title></title>
  </head>

  <body>
    <div data-role="page" id="home">

      <div data-role="header">
      </div>
      <div data-role="content">
      </div>
      <div data-role="footer">
      </div>

    </div>
  </body>

</html>
```

The Template for our Mobile pages

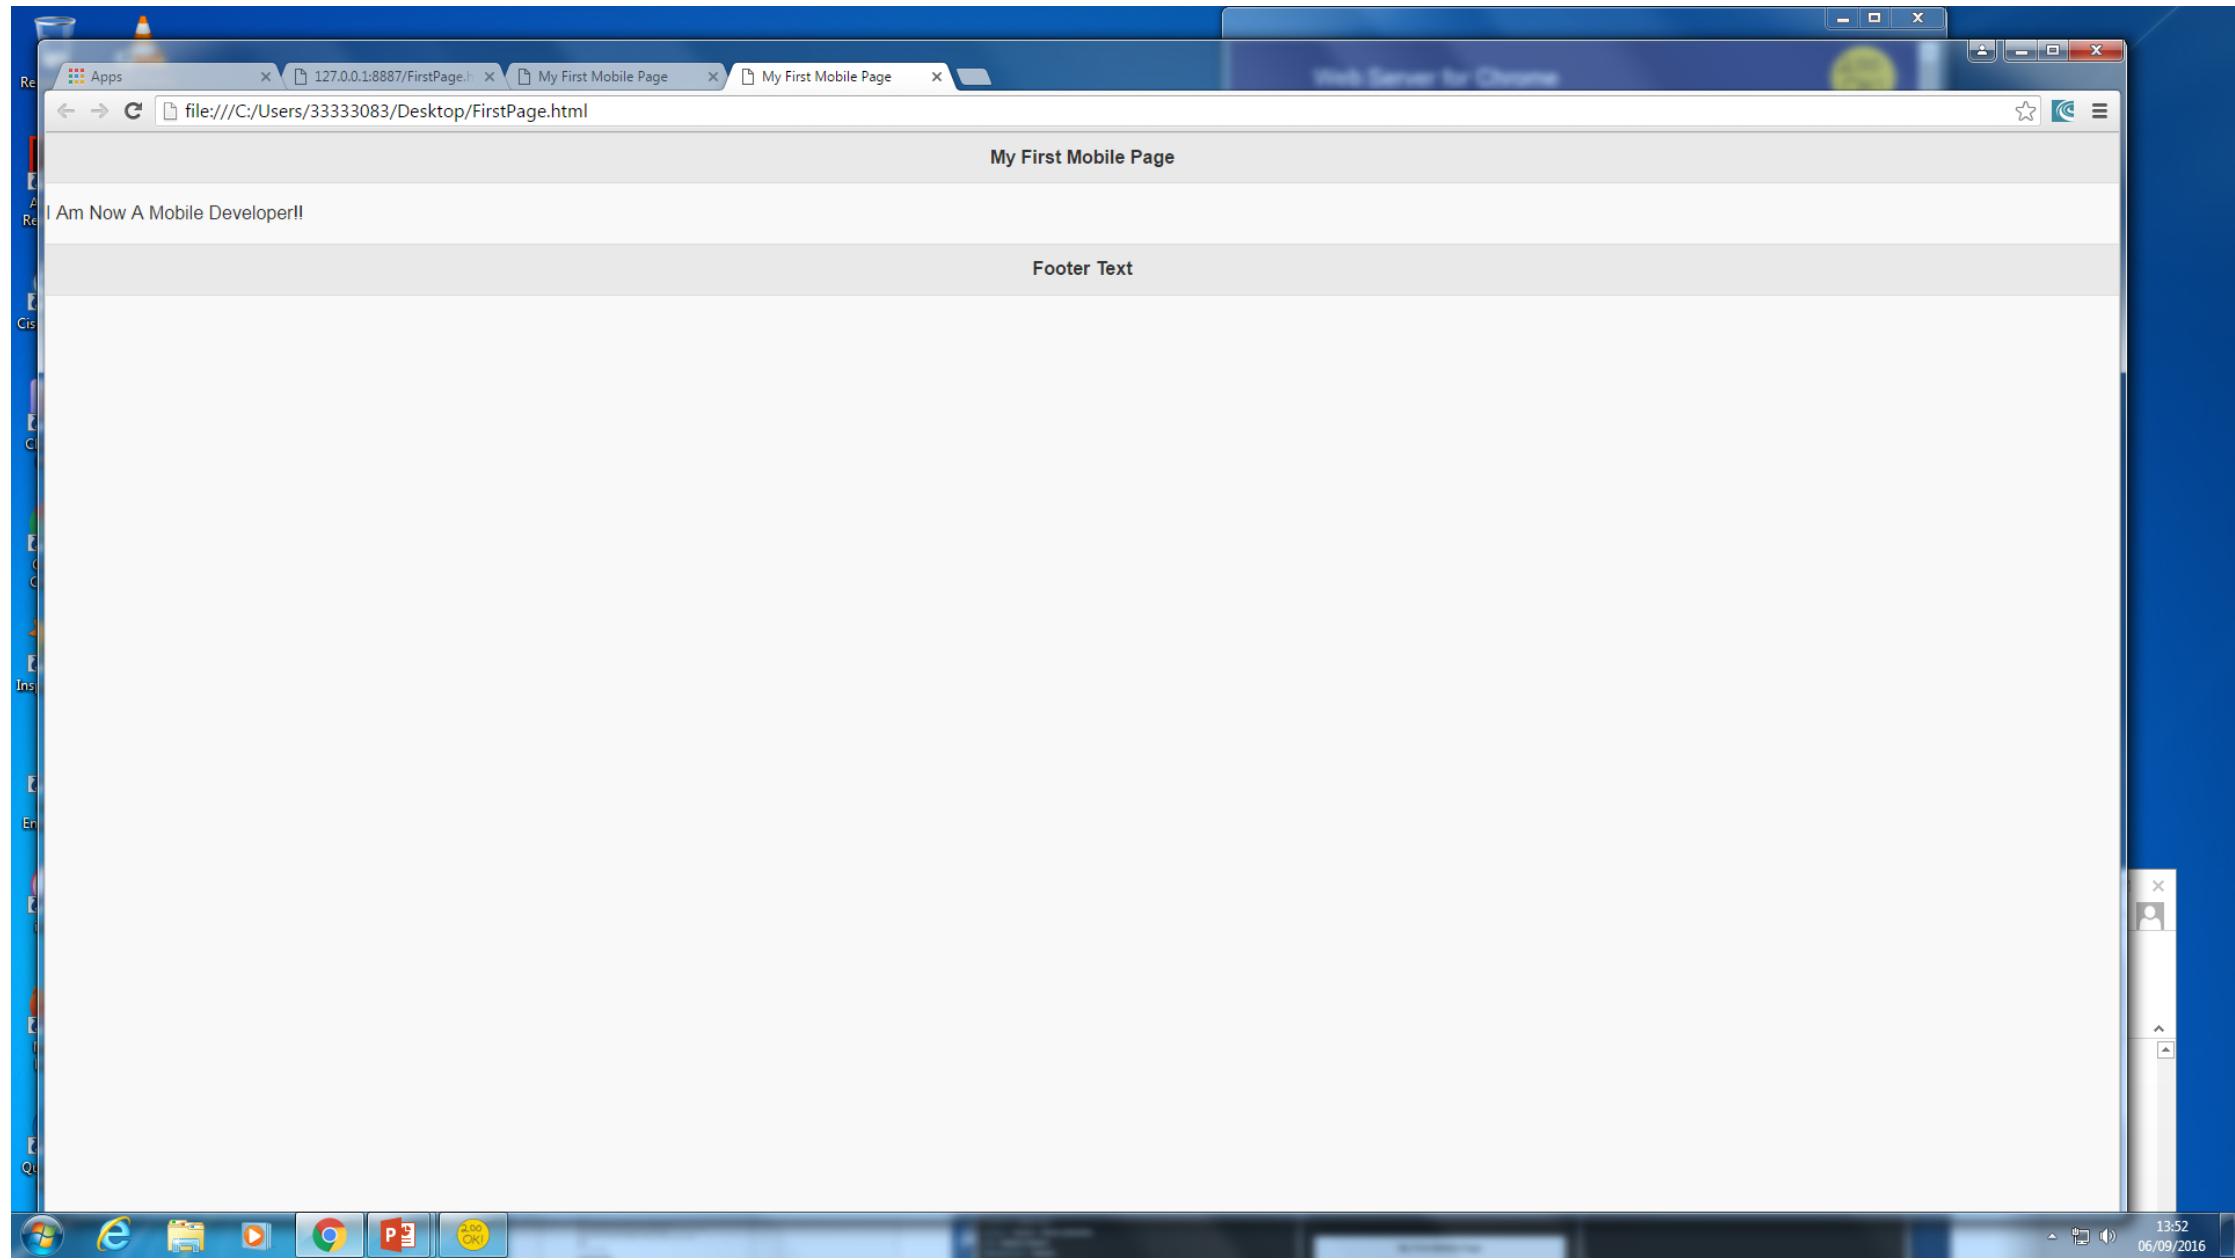

```
<body>
<div data-role="page">

    <div data-role="header">
        <h1>My First Mobile Page</h1>
    </div>

    <div data-role="main">
        <p>I Am Now A Mobile Developer!!</p>
    </div>

    <div data-role="footer">
        <h1>The Footer Text</h1>
    </div>

</div>
</body>
```

Organization of a Simple JQM App

- Each JQM page (in HTML) can contain multiple ‘pages’
 - A `<div>` (block division) element can be used to create a separate page...
 - Separate `<div>` elements can
 - be used to organize the page into header, content and footer sections...

```
<html>
<head>
...
</head>
<body>
    <div data-role="page" id="one">
        <div data-role="header">
            ...
        </div>
        <div data-role="content">
            ...
        </div>
        <div data-role="footer">
            ...
        </div>
    </div>
    <div data-role="page" id="two">
        ... etc. ...
    </div>
    <!-- more page definitions -->
</body>
</html>
```

Multi-Page Outline

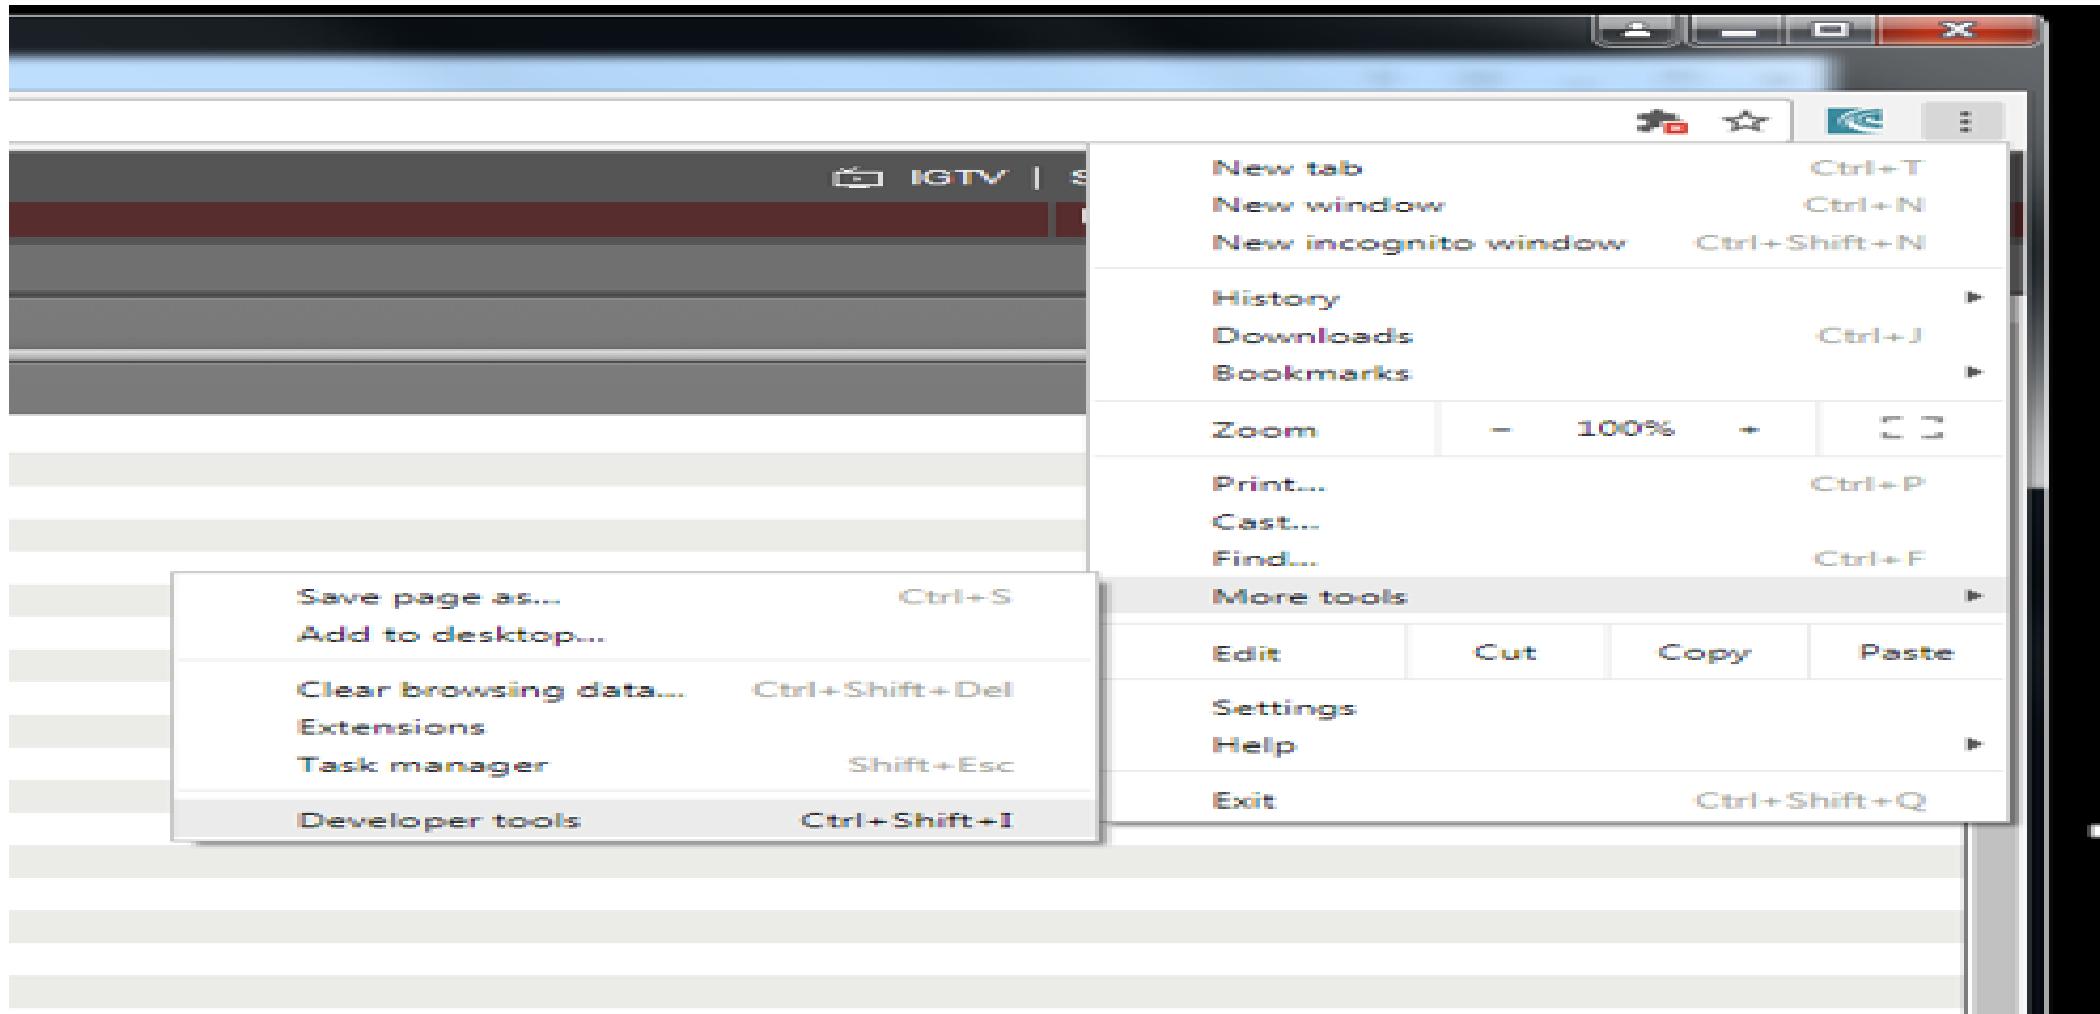

```
<!DOCTYPE html>
<html>
<head>
<meta name="viewport" content="width=device-width, initial-scale=1">
<link rel="stylesheet" href="http://code.jquery.com/mobile/1.4.5/jquery.mobile-

- Install:
The Ripple
emulator

The screenshot shows a Google Chrome browser window displaying the Ripple Emulator (Beta) page on the Chrome Web Store. The URL in the address bar is <https://chrome.google.com/webstore/detail/ripple-emulator-beta/geelfphabnejhd>. The page title is "Ripple Emulator (Beta) - Chrome Web Store". A yellow banner at the top right says "You will need Google Chrome to install most apps, extensions and themes." with a "Download Google Chrome" link. On the left, there's a sidebar with categories like Apps, Games, Extensions, Themes, TYPES (Chrome Apps, Websites), CATEGORIES (All), FEATURES (Runs Offline, By Google, Free, Available for, Works with), and RATINGS (★ ★ ★ ★ ★). The main content area shows the Ripple Emulator extension details: "Ripple Emulator (Beta)" by ripple.tinyhippos.com, 619 reviews, 181,139 users, and an "AVAILABLE ON CHROME" button. It features a screenshot of the Ripple interface showing a compass and a map. To the right, there's a description: "A browser based html5 mobile application development and testing tool. Welcome to Ripple, The Mobile Environment Emulator! Ripple is a multi-platform mobile environment emulator that is customized to mobile HTML5 application development and testing. Ripple aims to reduce the challenges being faced by mobile developers caused by today's platform fragmentation in the marketplace. Ripple is targeted towards WebWorks, PhoneGap, and mobile web development and testing!" Below the description are links to "Website" and "Report Abuse". Under "Additional Information", it lists Version: 0.9.15, Updated: March 8, 2013, Size: 4.5MB, and Language: English. At the bottom, there's a "Users of this extension have also used" section with links to "Page Ruler", "Capture Webpage Screenshot Entirely.", "Tag Assistant (by Google)", and "Proxy SwitchyOmega". The bottom of the screen shows the Windows taskbar with icons for File Explorer, Edge, Task View, Google Chrome, Word, Excel, and OneDrive.

Install: Web server for Chrome

The screenshot shows the Google Chrome Web Store page for the 'Web Server for Chrome' extension. The URL in the address bar is <https://chrome.google.com/webstore/detail/web-server-for-chrome/ofhbbkphhbklf>. A yellow banner at the top states: "You will need Google Chrome to install most apps, extensions and themes." with a link to "Download Google Chrome". The main content area displays the extension's details:

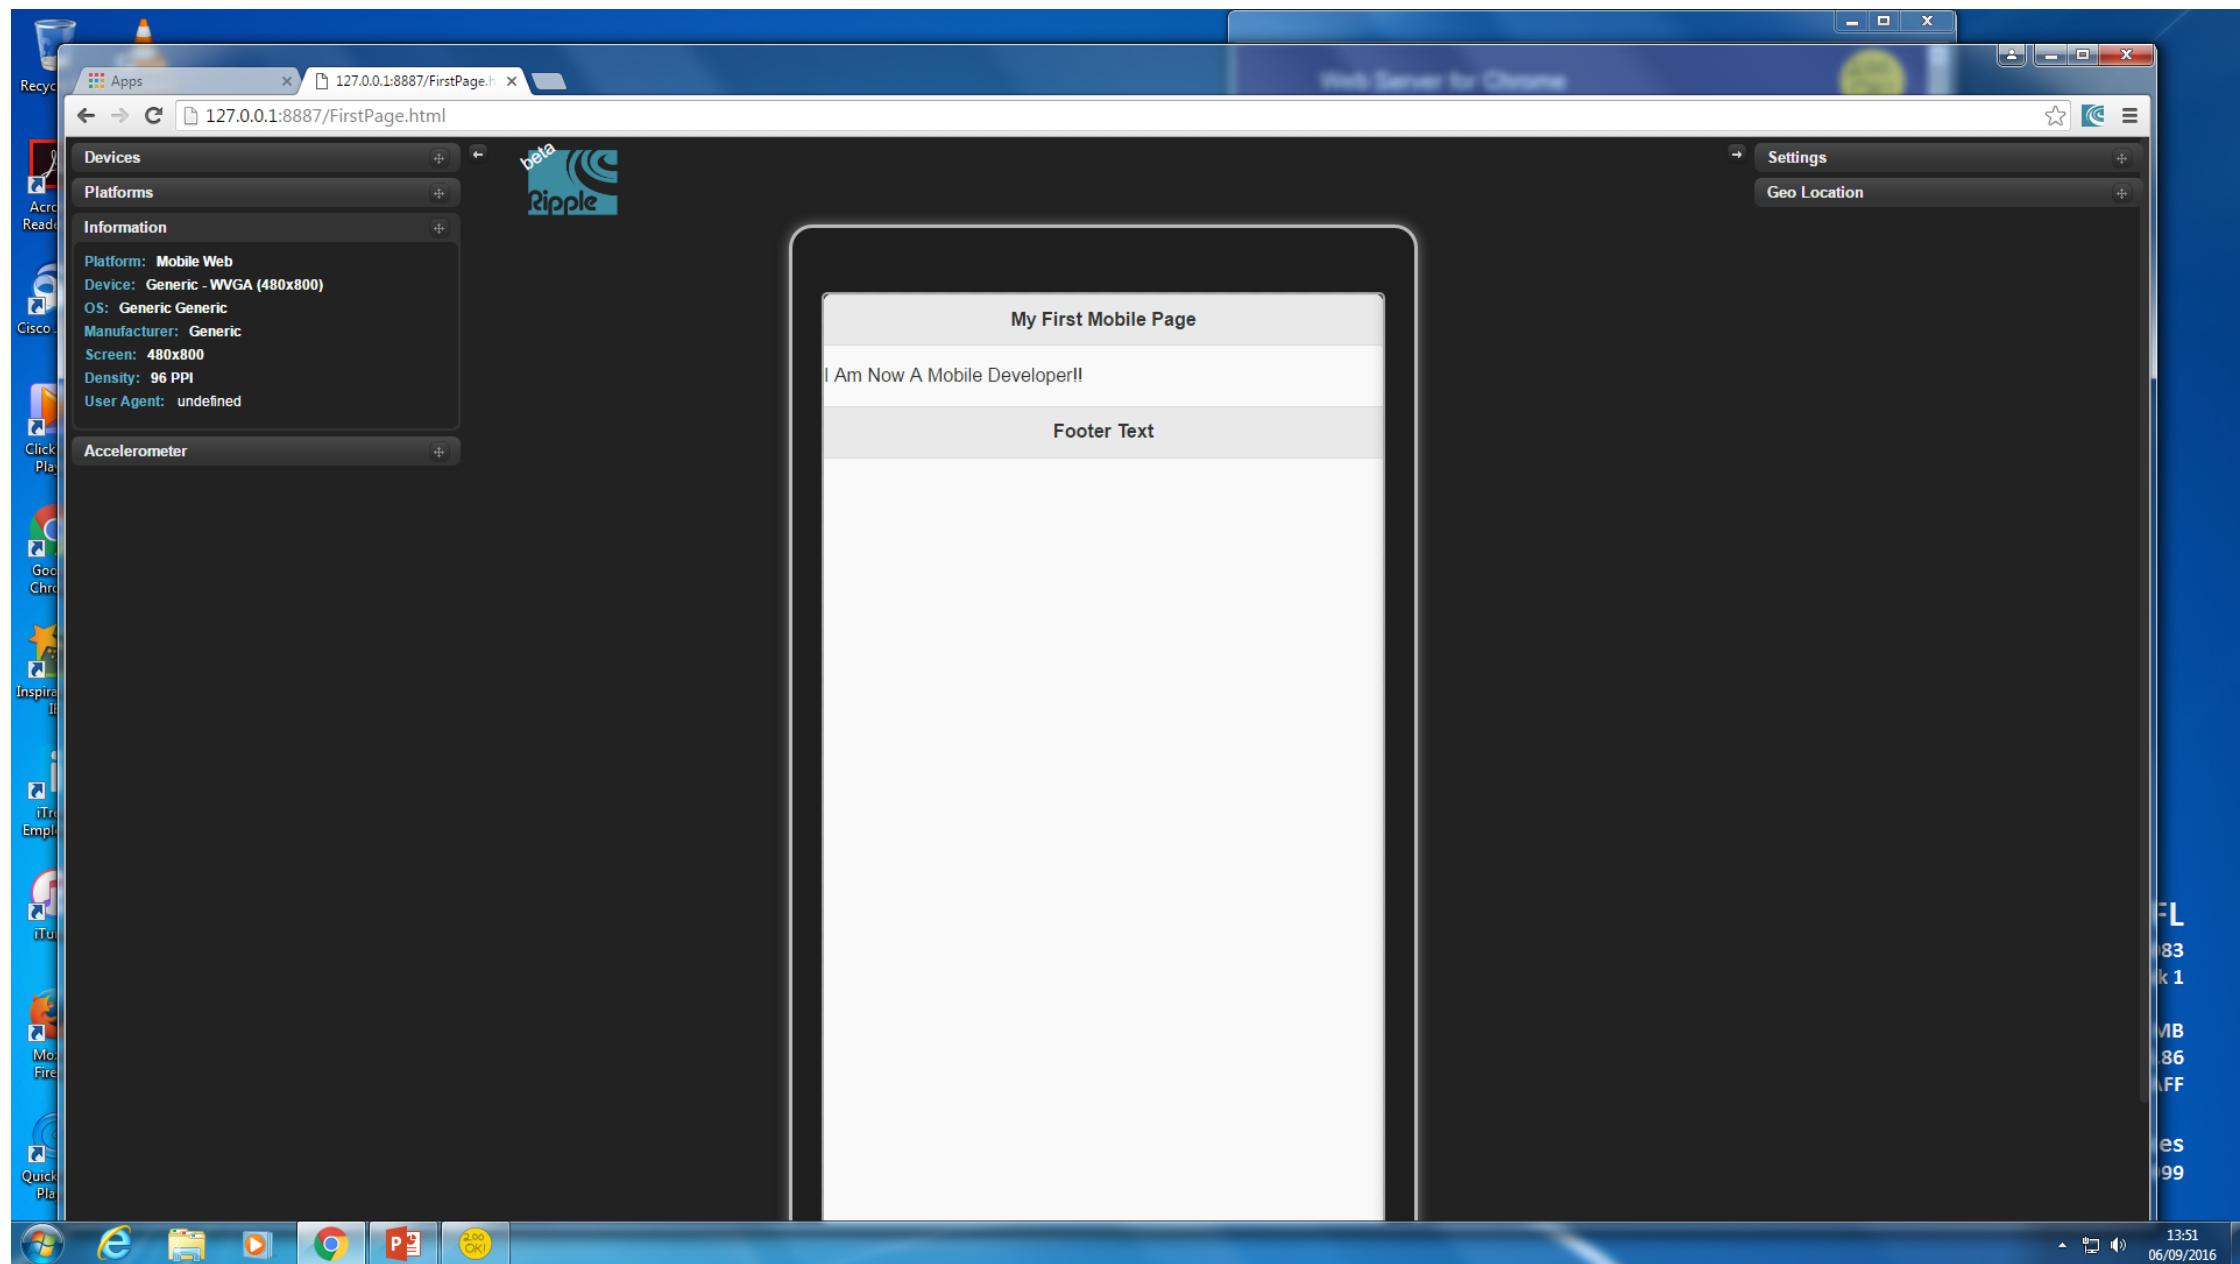

- Web Server for Chrome** (Offered by chromebeat.com)
- ★★★★★ (360) | Developer Tools | 40,343 users
- AVAILABLE ON CHROME**
- OVERVIEW** (selected), **REVIEWS**, **SUPPORT**, **RELATED**
- FEATURES**: Runs Offline
- CATEGORIES**: All
- RATINGS**: ★★★★★ (360)
- OPTIONS**:
 - Web Server: STARTED
 - Web Server URL(s)
 - http://127.0.0.1:8000
 - http://10.33.103.51:8000
 - Run in background
 - Accessible to other computers
- DESCRIPTION**: A Web Server for Chrome, serves web pages from a local folder over the network, using HTTP. Runs offline.
- DETAILS**: Web Server for Chrome is an open source (MIT) HTTP server for Chrome. It runs anywhere that you have Chrome installed, so you can take it anywhere. It even works on ARM chromebooks.
- OPTIONS**:
 - Website
 - Report Abuse
- ADDITIONAL INFORMATION**: Version: 0.4.1, Updated: May 23, 2016, Size: 439KB, Language: English
- USERS OF THIS APP HAVE ALSO USED**: Postman, Vysor, Text, Chrome Apps & Extensions Developer
- EDITOR'S PICKS**: Chrome favorites in apps

</html>
```

The screenshot shows the Ripple Emulator interface running on a Windows desktop. Two windows of the emulator are visible, each displaying a different page of a multi-page application.

Top Window (Foreground):

- Header:** Shows the URL `127.0.0.1:8887/multipage.html`.
- Sidebar:** Includes sections for **Devices**, **Platforms**, **Information** (showing details like Platform: Mobile Web, Device: Generic - WVGA (480x800), OS: Generic Generic, Manufacturer: Generic, Screen: 480x800, Density: 96 PPI, User Agent: undefined), and **Accelerometer**.
- Content Area:** Displays a mobile web page with a button labeled [Go to Page Two](#).

Bottom Window (Background):

- Header:** Shows the URL `127.0.0.1:8887/multipage.html`.
- Sidebar:** Includes sections for **Devices**, **Platforms**, **Information** (showing details like Platform: Mobile Web, Device: Generic - WVGA (480x800), OS: Generic Generic, Manufacturer: Generic, Screen: 480x800, Density: 96 PPI, User Agent: undefined), and **Accelerometer**.
- Content Area:** Displays a mobile web page with a button labeled [Go to my home page](#).

Windows Taskbar:

- Icons for various Windows applications like File Explorer, Google Chrome, Microsoft Edge, and Microsoft Word are visible.
- The system tray shows the date and time as **06/09/2016 14:06**.

JQM Page Transitions

- JQM provides a set of CSS-based transition effects that can be used to make page changes more visually appealing
 - A new page can appear with any of the following effects:
 - slide (left to right)
 - slideup
 - slidedown
 - pop
 - fade
 - flip
 - flow – (shrink → slide → grow)
 - Intro to Programming

jQuery

Tables, Lists, Grids and Collapsibles

Table Example

```
<div data-role="main">
  <table data-role="table" >
    <thead>
      <tr>
        <th data-priority="6">CustomerID</th>
        <th>CustomerName</th>
        <th data-priority="1">ContactName</th>
        <th data-priority="2">Address</th>
        <th data-priority="3">City</th>
        <th data-priority="4">PostalCode</th>
        <th data-priority="5">Country</th>
      </tr>
    </thead>
```

```
<tbody>
  <tr>
    <td>1</td>
    <td>Glenn Affleck</td>
    <td>UWS</td>
    <td>Main street</td>
    <td>Paisley</td>
    <td>PA12BE</td>
    <td>United Kingdom</td>
  </tr>
</tbody>
</table>
```

Glenn Affleck UWS Main street

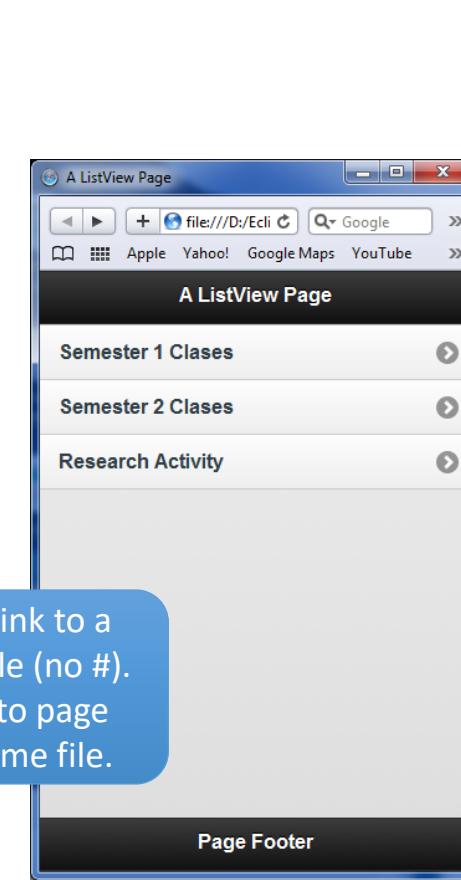

Footer Text

This screenshot shows the Ripple Beta mobile browser interface. The top navigation bar displays the URLs '127.0.0.1:8887' and '127.0.0.1:8887'. On the left, there's a sidebar with sections for 'Devices', 'Platforms', 'Information', and 'Accelerometer'. Under 'Information', device details are listed: Platform: Mobile Web, Device: Generic - WVGA (480x800), OS: Generic Generic, Manufacturer: Generic, Screen: 480x800, Density: 96 PPI, and User Agent: undefined. Below this is an 'Accelerometer' section. The main content area features the Ripple logo with 'beta' above it. A central modal window titled 'A Table Example' contains a table with three columns: CustomerName, ContactName, and Address. The table has one row with the values 'Glenn Affleck', 'UWS', and 'Main street'. At the bottom of the table is a footer with the text 'Footer Text'. The Ripple interface has a dark theme with light-colored UI elements.

Listview Pages

- Used for either links to multiple pages, or for displaying a list of data-items
 - e.g. mail messages, appointments, photo thumbnails

```
<div data-role="page" data-role="listview" id="main">
    <div data-role="header">
        <h1>A ListView Page</h1>
    </div>
    <div data-role="content">
        <ul data-role="listview">
            <li><a href="#sem1">Semester 1  
Classes</a></li>
            <li><a href="#sem2">Semester 2  
Classes</a></li>
            <li><a href="research-activity.html" data-  
rel="external">  
                Research Activity</a></li>
        </ul>
    </div>
    <div data-role="footer" data-position="fixed">
        <h4>Page Footer</h4>
    </div>
</div>
```

```
<div data-role="main">
